

CRISTIANO RONALDO

cristianoronaldo02070@gmail.com | +62 823-7316-1980 | Jakarta Utara, Indonesia | [LinkedIn](#) | [Portofolio](#)

Information Systems undergraduate (3.90/4.00 GPA) at Multimedia Nusantara University with expertise in AI/Machine Learning and full-stack web development. Experienced in building models, designing interactive dashboards, and developing web-based applications using Python, SQL, Power BI, Tableau, React, FastAPI, Laravel, and Oracle APEX. Adept at transforming complex data into actionable insights and building automated digital solutions across business domains.

Work Experiences

AI Engineer Intern – PT. Salam Pacific Indonesia Lines

Tanjung Priok, Indonesia | Feb 2026 – Present

- Developed an LLM model to support accident decision-making through structured output reports with 70% acceptance rate.
- Automated the medical checkup request process, reducing manual processing time by 80% (from 15 to 3 minutes per request).
- Built a dashboard for relocation monitoring with 8+ features, including status tracking, user authentication, role-based access, and automated container shipping input.
- Processed 200,000+ container records to calculate cost differences by line, container type, and period.
- Built a dashboard to compare container dwelling costs between 2 monthly periods.
- Designed scheduled scraping workflows to collect news periodically for LLM summarization, supporting expansion across 35 branches.

Website Support & Maintenance – Durrent Support

Tangerang, Indonesia | Sep – Dec 2025

- Identified and resolved 5+ website bugs to ensure optimal performance and user experience.
- Discussed clients' needs to understand their requirements for implementing website feature enhancements.

Website Design & Dev. Lab. Asst. – Multimedia Nusantara University

Tangerang, Indonesia | Aug – Dec 2025

- Conducted lab session for 14 weeks on HTML, CSS, JavaScript, PHP, Bootstrap, CodeIgniter, and Laravel.
- Guided a round of 40 students through lab modules, debugging issues, and improving their understanding of full-stack web development concepts.

Education Level

Multimedia Nusantara University – Tangerang, Indonesia

Aug 2023 - Aug 2027 (Expected)

Bachelor of Computer, 3.90/4.00 (3rd Year)

Relevant Coursework: Data Analysis, Data Visualization, Data Warehouse, Data Modelling, Deep Learning, Probability and Statistic, Database Systems, Database Administration, Object-Oriented Programming, User Experience, Web Design and Development

SMA Xaverius 1 – Jambi, Indonesia

July 2019 - May 2023

Social Sciences, 87,44

Organizational Experience

Website Division – Aura

Mar – Dec 2025

- Collaborated with the design and content divisions to implement visual concepts into responsive and functional website layouts, responsible for 2 main pages.
- Contributed to debugging, updating, and optimizing web elements to enhance their performance.

Skills, Achievements & Other Experience

- **AI & Data Analytics:** Python, R, SQL, Machine Learning, Deep Learning, RAG, LLM Integration, Prompt Engineering, Model Fine-tuning, Tableau, Power BI, Pentaho, ETL, Statistical Analysis
- **Web & Application Development:** HTML, CSS, JavaScript, PHP, Bootstrap, C#, PL/SQL, FastAPI, React, Laravel, CodeIgniter, Docker, Figma, PostgreSQL, MySQL, Oracle Database, Oracle APEX, Visual Studio, Postman, OOP, Unified Modelling Language
- **Soft Skills:** Communication, Teaching, Leadership, Time Management, Collaboration
- **Certifications:** Data Classification and Summarization Using IBM Granite – IBM (Jul 2025)
- **Language:** English (Intermediate), Indonesian (Native)
- **Achievements:** Awarded Academic Excellence Scholarship for ranking within the Top 5% Semester GPA among Information Systems students (Semester 4, 2025)

Projects

Classification of Online Gambling and Toxic from YouTube Comments

Aug – Dec 2025

- Built and fine-tuned a deep learning-based text classification model to detect and categorize toxic and gambling-related comments on YouTube using IndoBERT and LSTM, achieving 95% accuracy.

LLM Response Preference Classification Model Based on ChatBot Arena Data

Feb – May 2025

- Built and fine-tuned multiple machine learning models, including Random Forest, CatBoost, XGBoost, AdaBoost, and LightGBM.
- Achieving a rank within the top 35% of all participants in the contest.

Indonesia Socio-Economic Dashboards

Feb – May 2025

- Developed a Food Security and Nutritional Consumption dashboard in Tableau, analyzing 26,000+ data records.

GizmoGo - Electronic Rental Application Design

Feb – May 2025

- Tested with 7 users and received positive feedback on usability.
- Designed 5 key interfaces using Figma, including item detail and order pages, order history, chat system, and order confirmation screens.

ReserveGo - Restaurant Reservation Platform

Feb – May 2025

- Developed a website platform using Oracle APEX to build and implement 4 key modules, including user authentication, profile management, order history tracking, and feedback submission (ratings & reviews).

Democracy Prediction Through Classification and Time-Series Algorithm

Aug – Dec 2024

- Evaluated machine learning models, including k-Nearest Neighbors, Decision Tree, Support Vector Machine (SVM), and Random Forest.
- Conducted trend and forecasting analysis using time-series methods such as ARIMA, Simple Exponential Smoothing, and Holt's Exponential Smoothing.

LastBites - Food Waste E-Commerce Platform

Aug – Dec 2024

- Developed a food waste e-commerce platform with 8+ core features, enabling 2 restaurants to resell consumable leftovers and 5 potential users to test the ordering flow.

Lovender - Anti Sexual Violence Application Design

Feb – May 2024

- Designed a mobile application prototype using Figma to help users report, document, and access support resources related to sexual violence cases.

Sandang - Clothing Donation Application Design

Sep – Dec 2023

- Designed a clothing donation application prototype using Figma to connect donors and recipients, covering 5+ core flows such as donation submission, item browsing, recipient requests, and donation tracking.
